

AV House

Mazatlan, Mexico

2018

Residential renovation

1,480 m²

Photography

Aldo C. Gracia

The challenge of this project was to design a house with a large garden and adequate spaces to receive visitors. The house is located right at the center of the plot, thus allowing the distribution of a peripheral garden. The project consists of two buildings: the main house on two levels and a bungalow.

The house includes: living room, kitchen, family room, office, game room, pool and large terraces on the ground floor and four bedrooms on the top level. The bungalow consists of living room, kitchen, a bedroom and a movie theater on one floor.
