Mazatlan, Mexico

2015

Residential

622 m²

Photography

Aldo C. Gracia

This project arose from the need of the owners to create a space to receive family visits. The space is distributed on a single level that is integrated into the existing garden. Additionally, the main entrance displays a spectacular green wall.

The design takes advantage of the natural lighting that penetrates through its large windows and glass domes with metal beams. The project groups living room, dining room, kitchen and three bedrooms, each with its own bathroom and dressing room.
